

## 8-BIT SUBTRACTION

### EXP NO: 2

**AIM:** To write an assembly language program to implement 8-bit subtraction using 8085 processor.

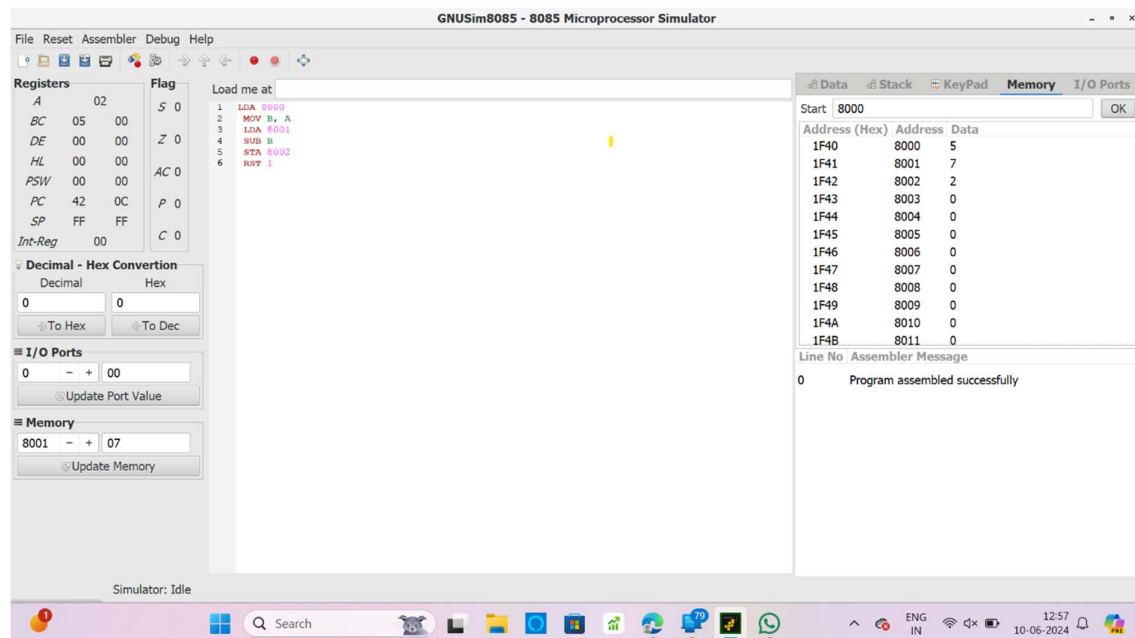

### ALGORITHM:

- 1) Start the program by loading the first data into the accumulator.
- 2) Move the data to a register.
- 3) Get the second data and load it into the accumulator.
- 4) Subtract the two register contents.
- 5) Check for borrow.
- 6) Store the difference and borrow in the memory location.
- 7) Halt.

### PROGRAM:

```
LDA 8000
MOV B, A
LDA 8001
SUB B
STA 8002
RST 1
```

### INPUT & OUTPUT:

**RESULT:** Thus the program was executed successfully using 8085 processor simulator.
